**Subject:** Final Report: (12SF073): Dimock Residential Groundwater Site and status update for 12SF088

Attached is the pdf of the final report for 12SF073 along with an EXCEL EDD.

Do you need the hardcopy final report mailed to you?

12SF088 Status Update - The confirmation samples have been analyzed on the GC/MS. Propylene glycol and ethylene glycol were not detected at or above the reporting limit of 2 ug/L. The nominal detection limit is 0.5 ug/L. There were no compounds detected between the detection limit and the reporting limit. The samples have been extracted for LC analysis and we hope to have data from that instrument early next week.
